

A 20 CITY INTERNATIONAL RADIO TOUR ACROSS AMERICA in OCTOBER/NOVEMBER 2008.....STAY TUNED!

HARTFORD, CT WICH AM NEWS-TALK 1310 AM MARK WAYNE 8:40-8:50 AM EST
OCT.13th

“Stem cells from the root canal? how closely should this be regulated?” – Mark

“As closely monitored as discarded nuclear waste....” – Bernie

AMHERST, VA WAMV AM 1420 AM BOB LANGSTAFF 9:10-9:20 AM EST
OCT. 13th

“Stem cells? promising ?” – Bob

“Yes, a viable source of SCs other than the umbilical cord blood or from the fetus’ 14 day blastocyst stage...to address the acute shortage of organs for transplant surgery...fact may soon be stranger than fiction....” – Bernie

BOSTON, MA WDIS AM 1170 AM DAN COLLIER 10:40-10:50 AM EST
OCT. 13th

“Interesting , compelling story about the future of stem cells....” – Dan

“Yes, if we put our minds to it in 10 years we could cure several diseases... perhaps clone the qualities of some of our former great leaders?...” – Bernie

MINNEAPOLIS, MN KFLD AM 1410 AM AARON IMHOLTE 4:15-4:30 PM EST OCT.
14th

“What inspired so many books?” -Aaron

“God only knows?..... divine inspiration?..... I stumbled across a 4 min video by Robin Cook about 20 years ago about how he began to write best sellers in about 6 weeks each summer since his residency....” – Bernie

ELYRIA/CLEVELAND, OH WEOL AM NEWS-TALK 930AM LARRY WRIGHT 10:30-10:39 AM EST OCT.
15th

“Interesting issues raised....” -Larry

“The investigation included research papers from clandestine clinics/labs outside the US along with 50 FDA regulated countries....” – Bernie

VERO BEACH, FL WTTB 1490 AM JUDYTH PIAZZA 10:00-10:15 AM EST
OCT. 23rd

For the complete interview click the following link <http://thesop.org/index.php?article=14317>

“What would you say to young writers?” – Judyth

“Writing is 99% perspiration, 1% inspiration, like the Olympics, a lot of mental gymnastics!” – Bernie

MINNEAPOLIS, MN KBEM-FM #1 JAZZ ED JONES 10:15-10:25 AM EST
OCT. 27th

“What would you say about your prolific writing?” – Ed

“An intense labor of love in about 6 weeks, usually each summer, very focussed, concentrated effort...”
– Bernie

COLORADO SPRINGS, CO KCMN AM 1530 AM TRON SIMPSON 11:40-11:45 AM EST OCT.
27th

“Stemwinder..... one scary, spooky story!” – Tron

QUINCY, IL WQUB 90.3 FM JIM LENZ 12:00-12:10 PM EST
OCT. 27th

“Your background? D.D.S.?... doctor of dental science?” -Jim

“Yes, doctor of dental science and surgery, I had an affinity for medical terms... surgery, otherwise I might have become a minister, D.D.V., doctor of divinity, but I could never remember who begat who...”
– Bernie

“Cloning raises several ethical issues....” – Jim

“Yes...how far would you go to bring back a loved one?...’for man is appointed only once to die..’
Hebrews 9:27 KJV.” – Bernie

OMAHA, NE KMA-AM NEWS TALK CHUCK and DON 9:45-9:55 AM EST
NOV. 7th

“Stem cells from the root canal, very exciting....” – Chuck

“The most exciting discovery in dentistry in ages.....” – Bernie

“You’re the detective Dr Gum, the main character in all your books....like the gumshoe
detective?....pretty creative.....” – Chuck

“Yes perhaps my alter ego? a nickname I acquired during my lengthy medical-dental education....from
an inexpensive ‘Gumtex’ surgical model I developed to train dentists doctors, profs around the globe.....”
– Bernie

“Yes, 26 and counting..I stumbled across a 4 min video of the prolific physician Robin Cook a long time ago about how he began to write in about 6 weeks each summer...I said by God I can do that!” – Bernie

“With the turn around of the Obama administration what do you think the future of stem cell research is?...” – Scott

“Still very promising. All it takes is for one celebrity or politician to be plagued with a debilitating disease such as Parkinsonism.....the publicity would prompt a complete about face to push ongoing stem cell therapy.....and ultimately find a cure....” – Bernie

“So this evil clinic Stemtronics is here in the US?” – Scott

“No in Singapore ..along with five or so other countries...Korea, China.... who do not adhere to the US and 50 other country’s FDA regulations, I would caution anyone going there for therapy...from the research papers obtained I wonder if some of the techniques are a hoax or if they’re already actually cloning even people....just because we may have the technology....it doesn’t give us the moral or ethical right to do so.” – Bernie

GAINESVILLE, FL WOCA-AM 1370 AM LARRY WHITLER & ROBIN 7:35-7:45 AM EST
NOV.17th.

“You brought up an interesting point about how they examined the pregnant woman...” – Robin

“The tiny nanobots like a school of fish could explore the woman’s birth canal replacing endoscopes....then build an image like an MRI...” – Bernie

“So there is this fear that the women and their umbilical cord blood may become organ donors...?” – Larry

“Yes, the illicit trade of organs or women becoming breeder reactors.....” – Bernie

“How did you come up with the title of the book?” – Larry

“Stemwinder is the name of the winding mechanism on the old watches....in endodontics there is a technique before lasers called ‘the crown down technique’ where you use a winding watch motion.....part of the creative process in growing a story....” – Bernie

“Your fiction is actually based on a lot of science research?” -Larry

“Yes, an extensive period of inquiry and bibliography is at the end of each book, you can take the story or leave it but it does raise awareness, opens the minds of the reader to possibilities....as in my book ‘Alligator Alley’ about the recent discovery of something in alligator blood to prevent disease.....” – Bernie

“Yes, new teeth, gum tissue and eventually entire organs because of the totipotency of the stem cells. A tremendous potential benefit in all branches of medicine.” – Bernie

“A dentist who also writes?” – Bob

“Yes, inspired by Michael Crichton, God rest his soul, with his science gone awry stories and perhaps dentist turning novelist like Zane Grey who went on to pen about 90 books mostly westerns, was also a dentist. God willing maybe I’ll pen that many?” – Bernie

SUNLAND/ L.A., CA CRN (CABLE RADIO NETWORKS) JACK ROBERTS 8:40-8:55 AM EST
NOV.10th

“Being a Catholic faith I found the Nazi medical experiments on humans unbelievable and unacceptable...” – Jack

“Yes, being a God fearing Christian myself, I found the atrocities highly unethical ...” – Bernie

“But for debilitating diseases it sounds promising?” – Jack

“Yes, everyone has stem cells which can be grown to replace missing teeth, a lost kidney for example and ultimately address debilitating diseases such as Alzheimers, Parkinsons..” – Bernie

“Stem cells in the root canal, a recent discovery?” – Jack

“Yes, a very recent discovery, some of the research included information from the think tanks in Palo Alto, USC, UCLA, CalTech in LA, some of the newer nanomedical texts just being written and even papers from clandestine clinics around the globe...” – Bernie

KANSAS CITY, KS KAIR-AM 1470 AM RACHEL LEHCAR 10:30-10:40 AM EST
NOV.10th.

“Stem cells from the root canal?” – Rachel

“They’re found ubiquitously in everyone....” – Bernie

“So these are science fiction stories based on fact?” – Rachel

“Yes, recent leading edge medical advances and so on spun into a shocking story.....let the characters drive the action, I never know where it will go?” – Bernie

“So where do you go to write these stories?” – Rachel

“I usually cocoon myself for about 6 weeks each summer..... ” (hopefully a warm weather retreat in Pismo Beach in the future, like a couple ‘Weekend at Bernies’) – Bernie

LAS VEGAS, NV (State wide) KWNA-AM 1400 AM RODD WILLIAM STOWELL 11:10-11:30 AM EST
NOV.10th

“So Dr Gum sleuths out this evil dentist?” – Rodd

“Yes, this evil endodontist Dr Shine who takes the technology to a whole new level ultimately finding it’s way into a sinister clinic....” – Bernie

“Dentists are perceived as frightening, pain inflicting...like in the Marathon Man, or the woman who is so fearful she’d rather give birth....the dentist replies by telling her to make up her mind now before he adjusts the angle of the chair! ...Does this cause any psychological trauma?” – Rodd

“Not really, dentistry demands focus, attention to detail, your patients walk away happy, alive... whereas following some heart or neuro surgeries or kidney dialysis they may be confined or hooked to a medical device” -Bernie

“So is this the future of dentistry, what about another book, a sequel?” -Rodd

“Yes, we’re approaching the evidence based medical model, saliva, genetic testing, stem cell therapy, lasers, painfree technology, complete spa treatment.....or as part of a hospital or general group practice with a GP, ObGyn,....perhaps spin off a medical dental TV series like ER?” – Bernie

MILWAUKEE, WI WBEV-AM ‘THE IDEA EXCHANGE’ JIM STOWELL 11:06-11:18 AM EST
NOV.18th

“So how do you write, in about 6 weeks each summer?” – Jim

“I get up about 7:30 write til noon, a short break, then write into the afternoon, take a break for tennis, then write into the evening. It’s like being on a film set. It’s full time. Action, actor driven, never know where it will go, how it will end....” – Bernie

“Any offers from Hollywood to write a screenplay?” – Jim

“Exploring several possibilities, ‘Terra Vista’ starring Sir Richard Branson, ‘God Almighty’ featuring Oprah as God!, In ‘Rook’ Dr Gum and Bugs Bunny team up to solve a murder mystery style dinner theater....Was planning to set up a meeting through Planned TV Arts with Michael Crichton, such an untimely tragic loss, to discuss a spin off of ‘Stemwinder’ and ER, perhaps a medical dental drama series?” -Bernie

“Such an imagination from a dentist, what do your patients think?” – Jim

“Surprised, shocked....Zane Grey was also one of the only other dentists to write at the turn of the century. Wrote 90 books, mostly westerns, probably inspired some of the Clint Eastwood films.....” – Bernie

GOOD NEWS BROADCAST.COM <http://www.youtube.com/watch?v=5y6EHZWWU6w> PAUL
SLADTKUS 11:30-11:40 AM EST NOV.21st

“So what is a gumshoe? I knew the shoe business, you know your gums....” – Paul

“Gumshoe, I think it’s an old Hollywood term describing the detective like Dick Tracy or Sherlock Holmes, Dr Gum is this dental detective...” – Bernie

“So you’ll bring a pad and paper to a Yankees game and write something between innings?” – Paul

“Sure, between pitches....usually something inspires me, something I read or what someone said...” – Bernie

“You’ve written 26 books, what does your family, friends or colleagues think about it?” – Paul

“They didn’t believe me at first.....called me delusional etc. shocked in fact, but there they are...like everything else I said I did.....” – Bernie

“Any movies offers yet....who do you see as the characters?” – Paul

“A few proposals submitted, you never know?.....Dr Gum...let’s see, perhaps Ben Affleck, Dustin Hoffman or Richard Gere...there’s definitely a chemistry between the actors and actresses in the books....” – Bernie

“So you say your characters wake you up, your wife must find you fun to sleep with....” – Paul

“No wife, significant other yet, I’m still single. I don’t think she’d want to be with me for the six weeks while I eat, sleep, dream and breathe the book...” – Bernie

NEW YORK, NY WTbQ- AM NEWSTALK The FRANK TRUATT Morning Show 7:15-7:25 AM EST
NOV.26th

“So tell us about the book Stemwinder” – Rob

“With the recent discovery of stem cells in the root canal, Dr Gum explores the possibilities both good and bad, science gone awry, in the vein of Robin Cook and Michael Crichton....Dr Shine at NYU has pioneered the ‘Stemwinder’ technique.....Dr Gum is asked to join the team....” – Bernie

“Stem cells from where?” – Rob

“Stem cells, totipotent cells from the root canal, able to harvest and differentiate into various cells, tissues and ultimately organs....how far would you go to bring back a loved one?....rather than steal military secrets? simply clone parts of one’s memory....” – Bernie

“This Dr Gum is in all the books?” – Rob

“Yes, the protagonist, a nickname I acquired from my medical dental studies with my patent, the ‘Gumtex’ surgical training models....in a lecture one day someone said ‘hey it’s Dr Gum’....a stupid name perhaps but the name stuck....” – Bernie

“Tell me more about Dr Gum...” – Rob

“Dr Gum is a bit like Indiana Jones, James Bond or like Dr Ryan from the Clancy series.....Dr Gum delves deeply into each contentious issue that arises each year ...inspired by something I read or heard....” – Bernie
